Education

B.S Electrical Engineering
Fall 2018 – Spring 2022
University of Washington
Seattle
3.64 GPA

Skills

Python (Expert)
Java (Expert)
JavaScript (Proficient)
C/C++ (Proficient)
Verilog (Proficient)
HTML/CSS (Proficient)

ModelSim (Proficient)
Quartus (Proficient)
Git/GitHub (Expert)

Hackathons

DubHacks 2019
AngelHack 2019 Seattle

Objective

Obtain a software engineering internship.

Experience

UW Solar in the Urban Infrastructure Lab

Oct 2018 – Sept 2020

- Data analysis of vehicle inventory of UW Transportation fleet to help PhD students create a financial model for the electrification of UW Fleet.
- Project Lead for Manastash Ridge Observatory project. Worked with UW Astronomy Professor Oliver Fraser. Coordinated site visit to Observatory. Oversaw cost estimation, schematic and solar array design with UW Solar team to create a proposal and energy audit for a ground mounted solar array at the Observatory.
- Created and designed new UW Solar (<http://uwsolar.be.uw.edu/>) and Urban Infrastructure Lab (<http://uil.be.uw.edu/>) websites with CS undergrad. Weekly meetings with club officers, faculty, and UW Web developers to guide design and host an easily maintainable site. Created documentation for updating/maintaining the UW Solar website (<https://github.com/UW-Solar/Website-Reference>).

University of Washington (UW) Course Planner

July 2019 – Sept 2019

Web App with schedule visualization on a campus map, recursive course prerequisite trees, and course keyword search. Continuation of AngelHack 2019 Hackathon Project. Built *uwtools* library for parsing UW course catalog and time schedule websites (<https://pypi.org/project/uwtools/>). Presented project to UW IT Academic Experience Design & Delivery Team to improve MyPlan, (course management tool at UW) resulting in a course keyword search feature being added. <https://alexeidt.pythonanywhere.com>

Basketball Statistics Tracking

Jan 2019 – Aug 2019

Program to keep track of player statistics for a Basketball team. Use of Java Swing to create an intuitive UI to create teams and track player statistics. <https://github.com/AlexEidt/Basketball-Statistics-Tracking>
